WORK EXPERIENCE

Web Developer Intern Oct 2021 - Dec 2021
PAI College Of Veda I Pune

- I was Responsible for designing, creating, Implementing, and Debugging the software.
- I worked on many already build WordPress projects to redesign and implement new features.
- I also worked on many new projects which we built from Scratch.

Software Developer Sept 2022 - Now
CineTech India Enterprises

- I am responsible for designing, creating, maintaining and implementing new features.
- I am also part of the team which works on the new project design pattern and builds user-friendly products.

PROJECTS

Online Examination System Oct 2021 - Jan 2022

- This system's front-end is based on HTML5, CSS3, JavaScript, and Bootstrap 4 and the back-end is based on Core PHP and MySQL.
- This system provides MCQ-based exams and quizzes.
- I built this system to make exams easy to manage and make an organization's data centralized.

B2S-Local E-Marketplace Feb 2022 - Jun 2022

- This system's front-end is based on HTML5, CSS3, JavaScript, and Bootstrap 4 and the back-end is based on Core PHP and MySQL.
- This is a classified ads website, where we can post ads and view ads to sell or buy things online.
- This system is built to give you the independency to view and buy anything from your local area.

Sorting Algorithms Visualizer July 2022 - August 2022

- This Project is built by using JavaScript.
- The whole aim of the project was to show my understanding of Front-end development and JavaScript.
- While working on this project I learned a lot about the JavaScript and JS Animations
